

LNG: BEST FUEL OF THE FUTURE

Bergen, Norway, 10th-12th of April 2018

The Go LNG project & the BALTIC SEA REGION LNG CLUSTER invite you to a “hands-on” International Conference, Study Trip and Matchmaking Event!

The global demand for Liquefied Natural Gas (LNG) is expected to increase 4-5% pr. year between 2015 and 2030! Most of the future LNG growth is anticipated to be created by further floating storage regasification units (FSRUs), the declining domestic gas production, small scale LNG and the transport sector.

With the expected increase in the demand for LNG in the near future, new investments are required worldwide to meet the growing LNG demand!

It is time for the Baltic Sea Region LNG Cluster Companies and Businesses to demonstrate their vast knowledge, cutting edge technologies and newest innovations to the world.

Join us for a 48 hour conference onboard Fjord Line’s LNG powered ferry, M/S Stavangerfjord, taking you from Bergen (Norway) via Hirtshals (Denmark) and Langesund, Oslo (Norway) and back again, while you can experience and learn more about:

- The latest news on LNG development and technologies
- TTS LNG bunkering
- Guided tour at M/S Stavangerfjord “LNG from the Engine room to the Bridge”
- Matchmaking meetings with leading market players
- Outstanding networking opportunities

Come and join us
